

Top Ten Reasons to Implement Your SAP System on EMC Information Infrastructure

- 1 Experience**
In their 10-year partnership, EMC and SAP have helped over 5,000 customers run their mission-critical businesses every day. These businesses benefit from test-proven solutions, reference architectures, and implementation experts.
- 2 Support for SOA**
Implementing a service-oriented architecture facilitates future growth. EMC[®] Invista[®], Rainfinity[®], and VMware[®] virtualization technologies support SOA and EMC is committed to SAP Adaptive Computing, having certified both its NAS and SAN storage with industry-leading server platforms.
- 3 Take the risk out of upgrades**
EMC has extensive expertise in aligning application and infrastructure requirements, including many of the world's largest SAP implementations. EMC helps SAP users maximize ROI across the application lifecycle, including upgrading or consolidating SAP business applications.
- 4 Fast, reliable backup and recovery**
Your SAP system is mission critical. EMC has the solutions you need for your backup and recovery environment and addresses a wide range of storage needs with the highest levels of availability, including certified "five-nines" (99.999 percent) availability.
- 5 Flexibility**
EMC replication solutions easily create copies of your SAP production database so you can react quickly to changing business requirements and have access to current data for test and development.
- 6 Reduced TCO**
EMC tiered storage lets you optimize your infrastructure for simplicity, performance, and economics. Choose from affordable entry-level solutions to high-performance, maximum-capacity configurations for your most demanding requirements.
- 7 System performance**
EMC supports SAP's document and data archiving scenarios with a direct link to EMC Centera[®] storage and online access from SAP production systems, improving SAP system performance and lowering TCO.
- 8 Integrated resource management**
Through EMC Smarts[®] technology, your infrastructure can support realtime, dependency-driven change, configuration, incident, and problem management across your SAP landscape and external applications to maximize the value of your SAP implementation.
- 9 Compliance**
EMC's document management solutions for SAP seamlessly integrate enterprise content management, archiving, and compliant records management of structured and unstructured data across all of EMC's storage platforms.
- 10 Industry leaders trust their information to EMC**
EMC is a trusted provider of information infrastructure, helping organizations of every size around the world keep their most essential information protected, secure, and continuously available while reducing overall infrastructure costs.
